SUMMARY

Motivated and detail-oriented web developer with experience gained through a comprehensive internship. Skilled in debugging, optimizing code, and collaborating with teams to deliver high-quality solutions. Eager to leverage a strong foundation in web development to contribute to innovative projects and enhance user experiences in a professional environment. Looking forward to learn and explore new ideas.

EDUCATION

Charotar University of Science and Technology

2019 – 2023

B.Tech - Computer Engineering - CGPA - 9.1

Anand, Gujarat

TECHNICAL SKILLS

Languages: JavaScript

Technologies/Frameworks: HTML5, CSS3, JavaScript, Tailwind CSS, NodeJS, ExpressJS, MongoDB, Redis

Developer Tools: VS Code

EXPERIENCE

Intern at Webmigrates Technologies LLP 

May 2023 - Oct 2023

Role - MERN Stack Developer

Surat, Gujarat

- Gained experience in server-side development, handling asynchronous operations, integrating APIs, and managing server-side logic.
- Integrated third-party APIs and learned how to use Postman or similar tools for testing.
- Familiarity with routing, middleware, API creation, handling requests, and setting up backend logic.
- Implemented features like user authentication, search functionality, upload images.
- Understood MongoDB databases, learned how to structure data, perform CRUD operations, and design efficient schemas.

PROJECTS

E-commerce Website  | [NodeJS](#), [ExpressJS](#), [MongoDB](#), [Redis](#), [Cloudinary](#), [Stripe](#)

2024 - 25

- Built a scalable, secure e-commerce website using Node.js and Express.js, providing an intuitive platform for users to browse products, manage carts, and make purchases.
- Role based authorization, providing access only to admins like create products, featured products, sales analysis.
- Developed RESTful APIs for efficient communication between front-end and back-end, allowing for real-time product updates, user authentication, and order management.
- Implemented Redis for caching frequently accessed data (e.g., featured product details, user sessions), resulting in improved application performance and reduced server load.

Chat Application  | [NodeJS](#), [ExpressJS](#), [MongoDB](#), [Cloudinary](#), [SocketIO](#)

2024

- Built a scalable and responsive chat application using Node.js and Express.js, enabling real-time communication between users.
- Integrated Socket.io to establish real-time, bidirectional communication between the server and clients, allowing users to send and receive messages instantly.
- Integrated Cloudinary for storing and managing images and media files, enabling users to send and share photos within chats.

User Authentication  | [NodeJS](#), [ExpressJS](#), [MongoDB](#), [Mailtrap](#)

2023-24

- Implemented User registration, login, role-based authorization, validation through e-mail, logout, forgot-password.
- JWT-based authentication with refresh token support.
- Secure RESTful APIs using expressJS database integration with MongoDB.
