SUMMARY

Motivated and detail-oriented web developer with experience gained through a comprehensive internship. Skilled in debugging, optimizing code, and collaborating with teams to deliver high-quality solutions. Eager to leverage a strong foundation in web development to contribute to innovative projects and enhance user experiences in a professional environment. Looking forward to learn and explore new ideas.

EDUCATION

Charotar University of Science and Technology   **2019 − 2023**
*B.Tech - Computer Engineering - **CGPA - 9.1***   *Anand, Gujarat*

TECHNICAL SKILLS

Languages: Javascript
Technologies/Frameworks: HTML, CSS, ReactJS, NodeJS, ExpressJS, MongoDB, PostgreSQL, MySQL
Developer Tools: VS Code

EXPERIENCE

Intern at Webmigrates Technologies LLP ↗   **May 2023 - Oct 2023**
Role - MERN Stack Developer   *Surat, Gujarat*

- Built dynamic and responsive user interfaces using React.js and Tailwind CSS, ensuring an optimal user experience.
- Gained experience in client-side development, handling asynchronous operations, integrating APIs, and managing server-side logic.
- Familiarity with routing, middleware, API creation, handling requests, and setting up backend logic.
- Implemented JWT authentication, role-based access control, and data encryption for secure user interactions.
- Understood MongoDB and Mongoose, learned how to structure data, perform CRUD operations, and design efficient schemas.

PROJECTS

E-commerce Website ↗ | NodeJS, ExpressJS, MongoDB, Cloudinary, Stripe   **2024 - 25**

- Built a scalable, secure e-commerce website using Node.js and Express.js, providing an intuitive platform for users to browse products, manage carts, and make purchases.
- Role based authorization, providing access only to admins like create products, featured products, sales analysis.
- Developed RESTful APIs for efficient communication between front-end and back-end, allowing for real-time product updates, user authentication, and order management.
- Implemented Redis for caching frequently accessed data (e.g., featured product details, user sessions), resulting in improved application performance and reduced server load.

Chat Application ↗ | NodeJS, ExpressJS, MongoDB, Cloudinary, SocketIO   **2024**

- Built a scalable and responsive chat application using Node.js and Express.js, enabling real-time communication between users.
- Integrated Socket.io to establish real-time, bidirectional communication between the server and clients, allowing users to send and receive messages instantly.
- Integrated Cloudinary for storing and managing images and media files, enabling users to send and share photos within chats.

User Authentication ↗ | ReactJS, NodeJS, ExpressJS, MongoDB, Mailtrap   **2023-24**

- Implemented functionalities like User signup, login, logout, forgot-password and reset-password.
- Using Mailtrap service, users will get 6 digit OTP on their verified mail for verification, after successfully logged in user will also get welcome mail.
- JWT-based user authentication with cookies.
- Integrated React which is responsible for handling the frontend of the website. It enables smooth user interactions, and secure communication with the backend
- Integrated zustand library with react for state management
